

Section 305 - Public Utility Service Connections

Section 305:00. Electric Service Connections. All electric service connections shall be made to comply with the code established by the State Board of Electricity and with policies established by the Public Utilities Commission.

Section 305:05. Water Service Leads. All water service leads shall be of materials, and connections shall be approved by the Superintendent of Utilities or other officials of the Public Utilities Commission.

Section 305:10. Sewer Connections. All connections to the system shall meet the approval of the Superintendent of Utilities. An application for permission to connect to the sewer system shall be filed with the Clerk before any digging for said connection is started.
